

### DIRECTIONS FOR MAKING A DOZENAL CLOCK

- Print this sheet, or resize the clock image available at [www.dozenal.org](http://www.dozenal.org) under “Resources” to the appropriate size.
- Cut out the clock around its outer edge and punch a small hole at the center dot.
- Remove the shielding from the face of your analog clock.
- Place your cut-out clock over the face of your analog clock. You may need to cut a line from the edge to the center to get it around the hands.
- Replace the shielding and tell time in dozenal.
